Portolan

Estimate: an intelligence briefing book

White paper, black ink and one highlighter. Every judgment carries its likelihood and source grade, so you can see how sure we are before you act on it.

Desktop · 3D influence map · Power matrix · Phone · One-page A4 brief

Desktop · Home

The briefing book opens on one page

Your dossiers on the left, and in the middle a memo with the key judgment, its likelihood and numbered reasons. Source notes sit on the right.

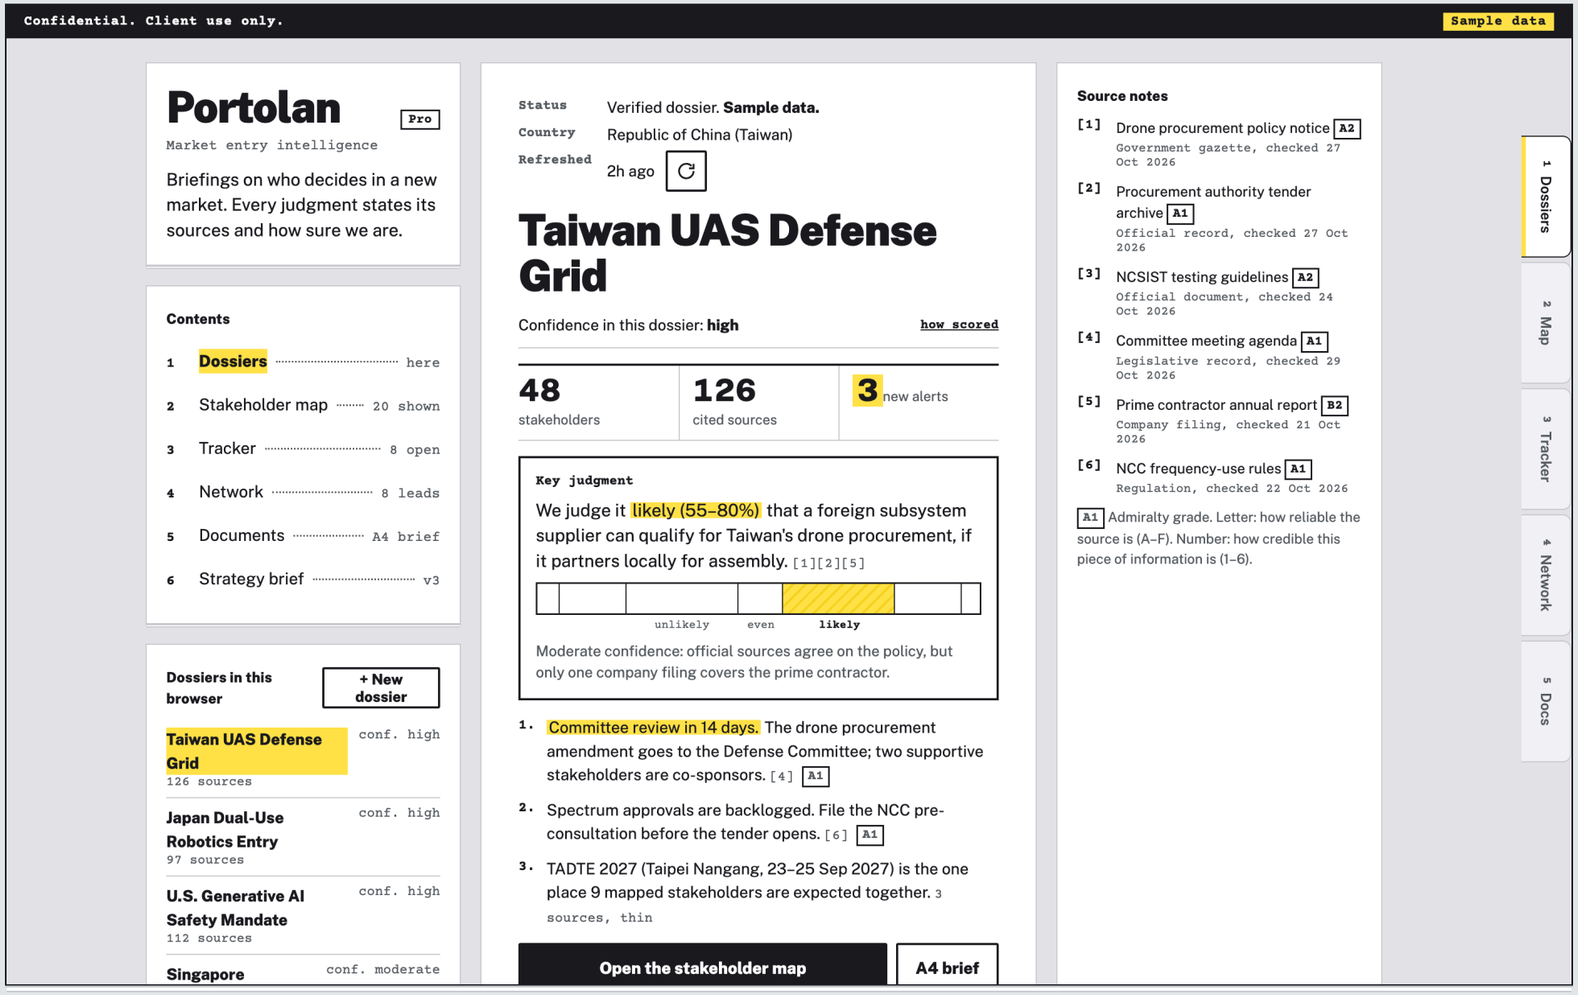

Exhibit · 3D influence map

Who is connected to whom

Rotate the map to see the network. Size shows influence and fill shows stance. The three highlighted contacts are who to call first, in order.

Confidential. Client use only.

Sample data

Section 2

Taiwan UAS Defense Grid

20 of 48 stakeholders shown.

3D influence map | Power matrix

Your team's connections

Show who already knows someone

All | Government | Industry | Capital | Legal | Events

Recommended first contacts, in order

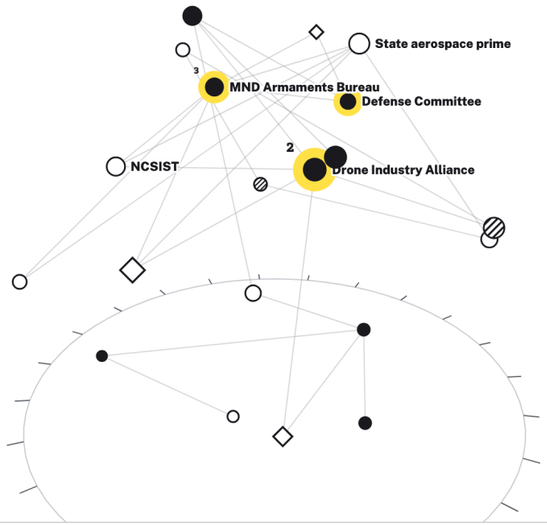

1 **Defense Committee**
Brief two co-sponsors before the committee review.

2 **Drone Industry Alliance**
Join as associate member; fastest route to local partners.

3 **MND Armaments Bureau**
Request a pre-tender capability briefing; lead with supply-chain provenance.

Exhibit 2

Three contacts open the procurement route; the prime contractor is the hinge.

Size shows influence; fill shows stance. Drag to rotate, tap a node. Source: Portolan analysis of 126 sources, sample data.

Supportive · Neutral · Resistant · Event · Your team · Warm tie · Contact first

Start with the highlighted three. They are the contacts Portolan recommends first, in order. Tap any node for its profile, stance and the sources behind it.

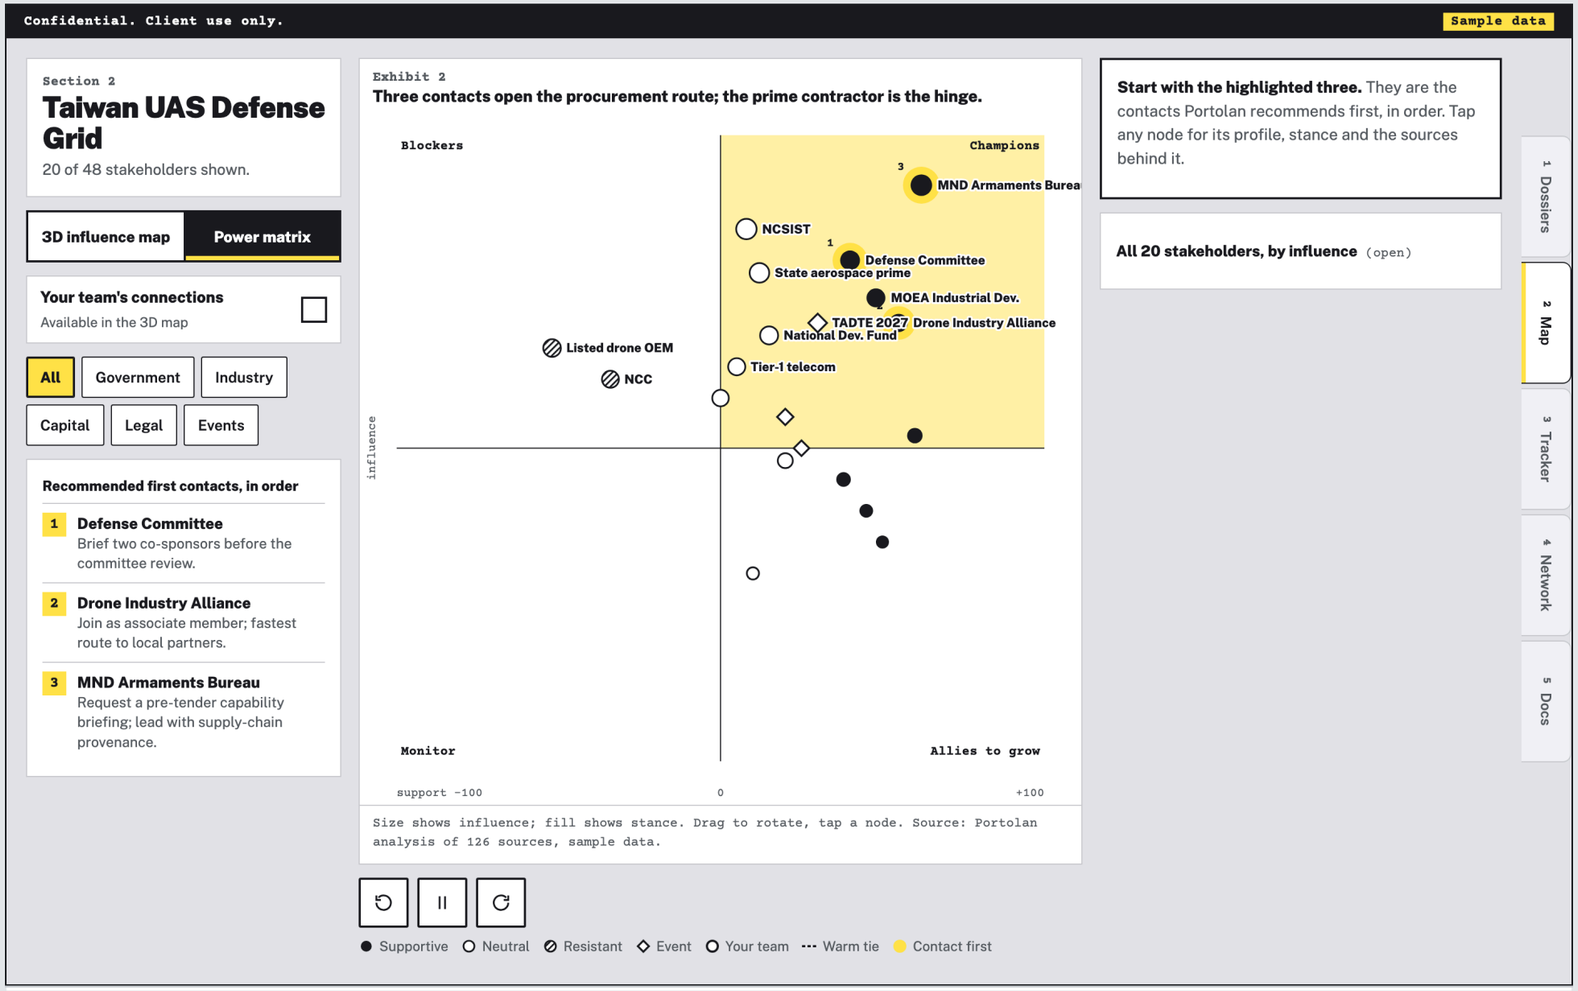

All 20 stakeholders, by influence (open)

2 Map
3 Tracker
4 Network
5 Docs

Exhibit · Power matrix

Who can help, and who can block

The same stakeholders, sorted by support and influence: Champions, Allies to grow, Blockers and Monitor. One click switches between the two views.

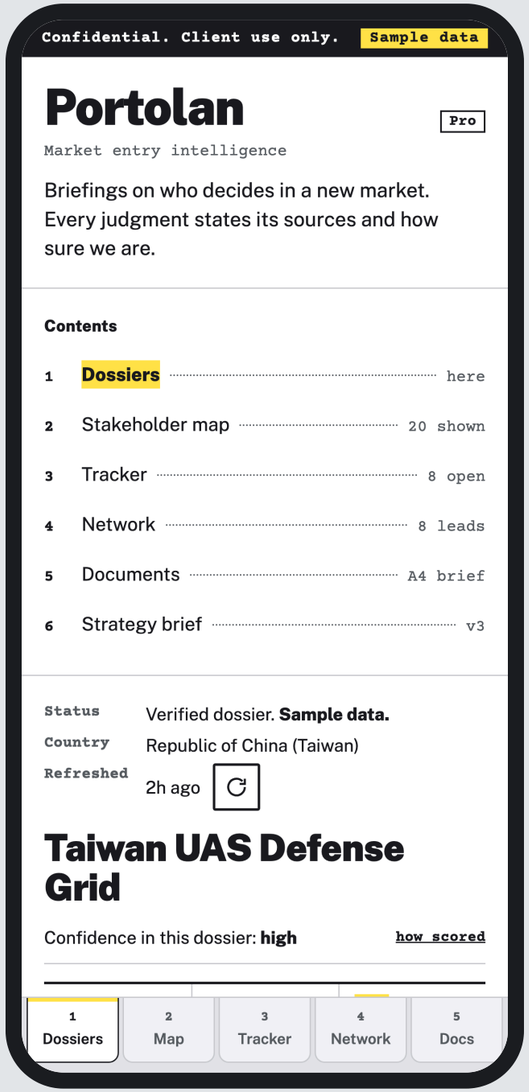

Phone

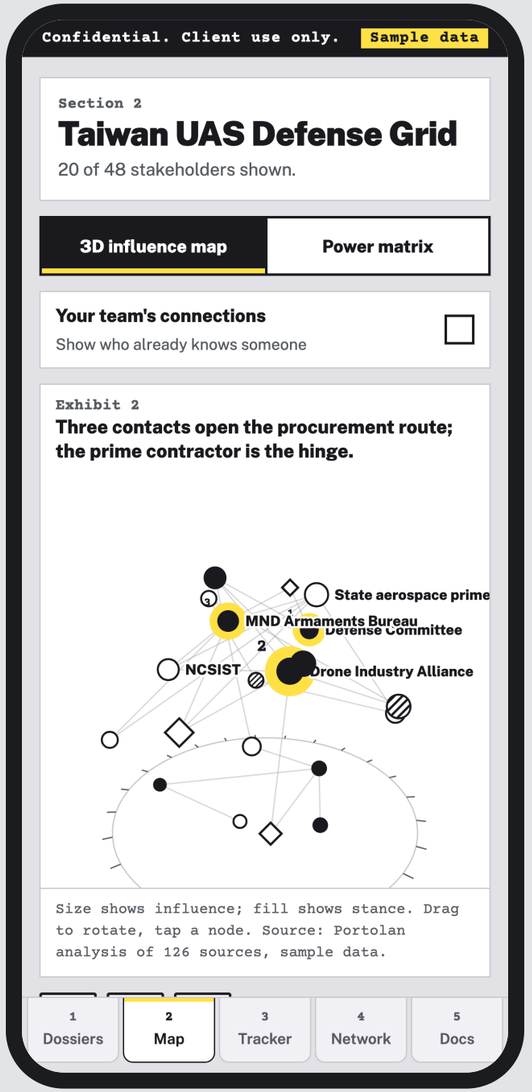

Read it on the way to the meeting

1. **Same dossier, one column**
   The memo, the map and the contact list, in the order you need them.

2. **Five tabs at the bottom**
   Dossiers, Map, Tracker, Network and Docs.

3. **Built for desktop first**
   The full workspace is on a laptop or monitor; the phone is for reading and sharing.

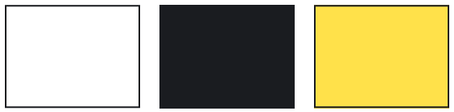

Built for trust

Every claim shows how sure we are

One highlighter

Yellow marks only what you should act on: who to contact first and the sentence that matters.

Stance without colour

- ● Supportive
- ○ Neutral
- ▨ Resistant
- ◇ Event

Reads the same in black-and-white print.

Sourced and graded

Source grade **A1** on the Admiralty scale

Likely (55–80%) on the standard intelligence scale

Private contact names stay hidden [redacted] until you choose to share them.

Market entry brief

Portolan

Taiwan UAS Defense Grid

Prepared for	Skyward Robotics (fictional)
Product	Counter-UAS sensor kit
Date	30 Oct 2026
Holdings	48 stakeholders, 126 sources
Confidence	High, for the dossier as a whole

Key judgments

Entry as a subsystem supplier is likely (55–80%) to qualify. [1][2][5]

Organised opposition is **unlikely (20–45%)** to block entry; the incumbent OEM is the main risk. [5][6]

Moderate confidence. Window to act: 14 days, until the committee review [4].

1. **Summary.** Taiwan is diversifying its drone supply chain away from restricted suppliers [1]. Foreign entrants with verifiable component provenance are welcome, but large contracts flow through a state-linked prime [5].
2. **Recommendation.** Enter as a subsystem supplier, secure a local assembly partner, and file spectrum approvals early [6].
3. **Timing.** The procurement amendment reaches committee in 14 days. Two supportive stakeholders are co-sponsors [4].

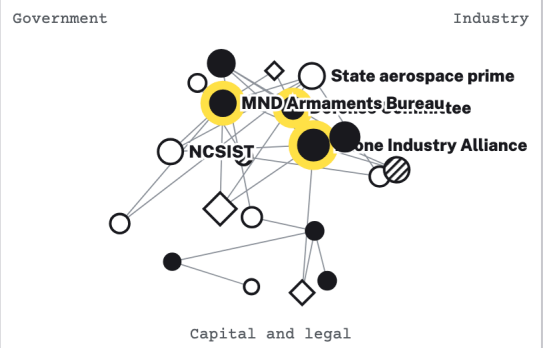

Exhibit 1. Government holds the most influence.
Filled = supportive, hollow = neutral, hatched = resistant, diamond = event. Size = influence.

Top 5 stakeholders

Stakeholder	Stance	Influence	Next move	Sources
MND Armaments Bureau	● Supportive	High, 92	Request a pre-tender capability briefing; lead with supply-chain provenance.	[1][2] A2 A1
NCSIST	○ Neutral	High, 85	Propose a joint field test on the 5.1 GHz detection gap.	[3] A2
Defense Committee	● Supportive	High, 80	Brief two co-sponsors before the committee review.	[4] A1
State aerospace prime	○ Neutral	High, 78	Position as a subsystem supplier, not a competitor.	[5] B2
NCC	⊘ Resistant	Medium, 61	File spectrum pre-consultation early; approvals are backlogged.	[6] A1

Recommended entry path

Subsystem supplier to the prime, backed by alliance membership and a local assembly partner.

7-day plan

Days 1–2	Brief two committee co-sponsors [4]
Days 3–4	Apply to join the drone industry alliance
Day 5	File NCC spectrum pre-consultation [6]
Days 6–7	Book TADTE meetings

Where to meet them

- **TADTE 2027**, Taipei Nangang, 23–25 Sep 2027. 9 mapped stakeholders
- **Procurement briefing day**, date unverified. 6 mapped
- **Drone ecosystem summit**, date unverified. 5 mapped

Key risks

- Spectrum approval may outlast the tender window [6]
- Incumbent OEM may contest foreign-supplier eligibility
- Export licence needed before shipping demo units
